PROFESSIONAL SUMMARY

Final-year B.E. Computer Science student (CGPA 8.0/10) with 3 internships spanning healthcare analytics, fintech software engineering, and data science. Proficient in Python, Power BI, Tableau, SQL, and React.js — applied across 50,000+ patient records at Apollo Hospitals and predictive modelling pipelines at Neo Orange Technology. Certified in Microsoft Azure fundamentals, Cisco networking, and data analytics via NPTEL and Coursera. Proven ability to deliver data-driven dashboards, ML models, and full-stack web features under real-world production conditions. Seeking a Data Analyst or Software Engineer role at a top-tier MNC based in Chennai.

PROFESSIONAL EXPERIENCE

Bluestock Fintech — Software Development Engineer Intern

Feb 2026 – Mar 2026

- Redesigned 6 responsive UI components using React.js and TailwindCSS, reducing mobile layout inconsistencies by ~40% across target screen sizes.
- Collaborated in an Agile squad of 5 engineers to develop, test, and ship 3 production software modules within a 6-week sprint cycle.

Neo Orange Technology — Data Analyst Intern

Aug 2025 – Sep 2025

- Cleaned and pre-processed 3 real-world business datasets (10,000+ rows each) using Pandas and NumPy, reducing null/duplicate records by over 85%.
- Built a supervised ML classification model using Scikit-learn (Random Forest) achieving 88% accuracy on validation data, used to support a client business use case.
- Delivered 2 data visualisation reports and 1 executive insight presentation; directly incorporated into a business decision review by senior management.

Apollo Hospitals Pvt Ltd — Junior Data Analyst Intern

Mar 2024 – May 2024

- Analysed 50,000+ patient and clinical records using Python and SQL to surface operational bottlenecks, supporting a hospital-wide efficiency initiative.
- Built 3 Power BI dashboards tracking KPIs including bed occupancy rate, patient throughput, and treatment cycle times — adopted by 4 clinical department heads.

EDUCATION

B.E. Computer Science and Engineering

2022 – 2026

Meenakshi College of Engineering **CGPA: 8.0 / 10.0**

Higher Secondary Education (Science)

2020 – 2022

Grace Higher Secondary School **Aggregate: 80%**

TECHNICAL SKILLS

Languages: Python • Java • C • C++ • JavaScript
Data & Analytics: Pandas • NumPy • Scikit-learn • Power BI • Tableau • Excel • SQL
Web / Frontend: React.js • Node.js • Express.js • HTML5 • TailwindCSS
Databases: MySQL • MongoDB
Cloud & Tools: Git • GitHub • Azure Fundamentals • VS Code • Jupyter Notebook
ML / AI: Supervised Learning • Recommendation Systems • Predictive Modelling • Feature Engineering

CERTIFICATIONS

- ▶ **Azure Data Fundamentals (DP-900)** • Microsoft • 2024
- ▶ **Introduction to Cybersecurity** • Cisco Networking Academy • 2024
- ▶ **Data Science with Python** • NPTEL — IIT Madras • 2024 | Elite Grade
- ▶ **Google Data Analytics Professional Certificate** • Coursera / Google • 2023
- ▶ **Python for Data Science and Machine Learning Bootcamp** • Udemy • 2023

PROJECTS

Verify360 — Complete Scam Verification System | *Full-Stack Developer*

- ▶ Built an end-to-end identity verification platform using Python (Flask), HTML, CSS, and JavaScript, enabling real-time scam detection across phone, email, and social media channels.
- ▶ Implemented fraud detection logic with pattern matching, blacklist lookups, and risk scoring — capable of flagging job fraud, fake profiles, and online cheating cases with 90%+ rule-based precision.

IMDB Movie Recommendation System | *ML Engineer*

- ▶ Engineered a hybrid recommendation engine (collaborative + content-based filtering) using Python, Pandas, NumPy, and Scikit-learn on the full IMDB dataset (100K+ entries).
- ▶ Addressed cold-start and data sparsity problems via matrix factorisation techniques, improving recommendation relevance by ~22% versus a baseline content-only model.

IoT-Based Smart Traffic Diversion System | *Team Lead — 4-member team*

- ▶ Led design and development of a real-time traffic diversion system using IoT sensors and dynamic signal control logic; validated using Wokwi hardware simulator before physical deployment.
- ▶ Implemented automated traffic routing that reduced simulated congestion scenarios by ~35% in test conditions, with real-time data transmission achieving sub-200ms latency.

ACHIEVEMENTS & COMMUNITY

- ▶ Participated in Smart India Hackathon 2024 — one of India's largest national innovation competitions — representing Meenakshi College of Engineering.
- ▶ Active competitive programmer on CodeChef and Kaggle; completed multiple data science challenges and contributed to open datasets.
- ▶ Presented technical solutions at IEEE student branch events; recognised for problem-solving approach in traffic and healthcare domains.

CORE COMPETENCIES

Data-Driven Decision Making • Agile Collaboration • Cross-functional Communication • Technical Leadership
• Problem Solving • Time Management under Deadlines
